

DTJ-320

全自动RFID贴标机

Automatic RFID labelling machine

DTJ-320全自动RFID贴标机, 为KAMGOLD针对单张吊牌贴标而设计的一款全自动化贴标产品, 适用贴普通标签和RFID芯片标签, 也可用于一张吊牌上贴单个标签或多个标签。贴标精度高、时又快。

DTJ-320 Automatic RFID labelling machine, professional machine to stick a label, used for normal labels and RFID labels, and can also be used to attach a single label or multiple labels to a hanging tag. High labeling accuracy and fast speed.

主要技术参数/Technical Parameters:

	1 headers	2 headers
速度/Speed	200-500pcs/min	
吊牌适用尺寸/Size of tags	25*35mm-300*400mm	
标签适用尺寸/Labels size	宽度/width:20-100mm; 长度/length: 10-80mm	
吊牌适用厚度/Thickness of hangtag	0.3-2.5mm	
吊牌放置高度/Height of feeding material	300mm	
机械尺寸/Machine size	2500*800*1700mm	2900*800*1700mm
机械重量/Machine weight	450KG	600KG
使用电源/Power supply	1 phase 220V	1 phase 220V
功率/Rate of work	3KW	4.5KW
贴标精度/Precision	± 0.5mm

广东荣共智能机械有限公司(前身东莞市石碣广工印刷包装机械厂)成立于2005年, 现位于惠州博罗智能装备产业园。自创办以来, 我们一直秉承“专注 专研”的经营理念, 长期为客户研发, 生产各类商标、吊牌、标签等印后自动化生产设备。

拥有多个发明和实用新型专利技术, 是业内知名的研发驱动型科技企业。服务于多家上市公司和世界500强企业, 业务范围拓展至全球多个国家。

本公司拥有研发工程师和售后服务技术人员多名。经过多年努力, 先后研发出全自动数码平压模切清废机、全自动圆压排废模切机、全自动RFID多头贴标机、全自动吊牌配页穿绳机等。并成为市场认可的印后自动化设备生产厂家。

创新科技, 启迪未来。我们致力于为客户提供完美的印后加工解决方案, 持续探索为您的企业节省人力, 提高品质, 创造效益。

广东荣共智能机械有限公司
Guangdong KAMGOLD Intelligent Machinery Co., Ltd.

Guangdong KAMGOLD Intelligent Machinery Co., LTD (KAMGOLD Printing and Packaging Machinery Factory) founded in 2005, currently located in Boluo Intelligent Equipment Industrial Park, Huizhou. Since its inception, we have been adhering to the "focus on professional" business philosophy. Long term research and development for customers, producing various types of post-press automated production equipment such as trademarks, hanging tags, and labels.

Having multiple invention and utility model patented technologies, is a well-known research and development driven technology enterprise in the industry. Serving multiple listed companies and Fortune 500 companies, expanding the business scope to multiple countries and areas around the world.

Our company has multiple R&D engineers and after-sales service technicians. After years of hard work, we have successively developed fully automatic digital platen press die cutting machine, full automatic rotary die cutting machine, fully automatic RFID multi heads labeling machines, fully automatic tag matching page threading machines, and so on. And become a recognized manufacturer of post-press automation equipment in the market.

Innovative technology, inspiring the future. We are committed to providing customers with perfect post-press processing solutions, continuously exploring ways to save manpower, improve quality, and create benefits for your enterprise.

全自动四头贴标机（普通型）
Automatic four headers RFID labelling machine (Normal)

▲ GYJ-620 全自动多头贴标机（普通型）

GYJ-620 主要技术参数/Technical Parameters:

	4 headers	6 headers
贴标速度/Working speed	480-960pcs/min	720-1440pcs/min
皮带速度/Speed of belt	20m-40m/min	
标签适用尺寸/Labels size	宽度/width:20-100mm; 长度/length: 10-80mm	
产品适用尺寸/Products size	宽度/width: 100-580mm; 长度/length: 120-580mm	
纸张厚度/Paper sheet thickness	0.2mm-1.2mm	
贴标精度/Label location precision	± 0.5mm	
机械尺寸/Machine size	6360*1500*1800mm	6960*1500*1800mm
机械重量/Machine weight	3000KG	3200KG
使用电源/Power supply	3 phase 380V/50HZ	
功率/Rate of work	15KW	17KW

GYJ-620S

全自动四头贴标机（高速型）
Automatic four headers RFID labelling machine (High Speed)

GYJ-620S 主要技术参数/Technical Parameters:

	4 headers	6 headers
贴标速度/Working speed	480-1440pcs/min	720-2160pcs/min
皮带速度/Speed of belt	20m-60m/min	
标签适用尺寸/Labels size	宽度/width: 20-100mm; 长度/length: 10-80mm	
产品适用尺寸/Products size	宽度/width:200-580mm; 长度/length: 280-580mm	
纸张厚度/Paper sheet thickness	0.2mm-1.2mm	
贴标精度/Label location precision	± 0.5mm	
机械尺寸/Machine size	6300*1500*1800mm	6900*1500*1800mm
机械重量/Machine weight	3000KG	3200KG
使用电源/Power supply	3 phase 380V/50HZ	
功率/Rate of work	15KW	17KW

▲ GYJ-620S 全自动多头贴标机（高速型）

适用范围/Applicable Scope:

GYJ-620/620S全自动多头贴标机是针对RFID嵌入式吊牌而专门设计，取代人工式贴标机械，贴标机头可根据客户需求增减。有前置式吸风式飞达送料和印刷机后置飞达送料可供选择。具有速度快、定位准、操作简单、效率高的特点。一台机器可顶替数十个人，是吊牌贴标的新式武器。

GYJ-620/620S Automatic multiple headers labelling machine specially designed for RFID inlay type tags, instead of manually labelling, machine head could increase or decrease according to customer's requirements. There are two feeding methods available: front suction feeder and printing machine rear feeder. It is fast and location accuracy. One machine can replace dozens of people, it is the tags sticking label new weapons.
